# ARCHITECTURE

# ARCHITECTURE

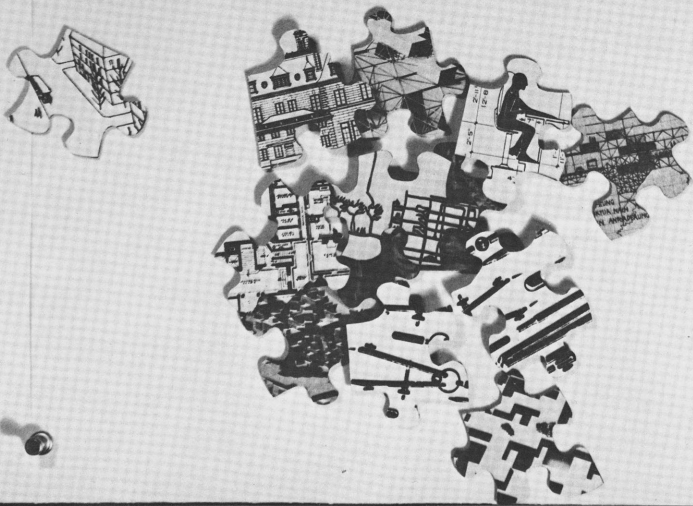

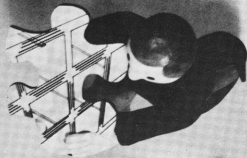

Many of our instructors are not on speaking terms. They hate each other!

Perhaps this is the most satisfying thing about the architectural school at Pratt. A student may pick and choose his own route by sampling from scores of different viewpoints and emerge a uniquely individual architect.

There can be no right philosophy in designing things. What is important is that the designing is done skillfully. In a world of architectural schools that preach their single-minded ideologies like world-saving doctrines,

Pratt stands out as a working alternative. One that continues to draw dissatisfied students from the most prestigious of other architectural schools.

Pratt is the Sony Trinitron in a world of black and white Zeniths. We've been given a choice here that does not exist anywhere else in an American educational system that preaches uniformity. Freedom of choice is still a must for the modern American and school was never as much fun.

# CONSTRUCTION MANAGEMENT

This is the manager that Pratt constructed.

This is the groundwork, surveyed by Weber; that showed where to put the foundation, laid by Unger and Procaccine; that became the first bricks that made the manager that Pratt constructed.

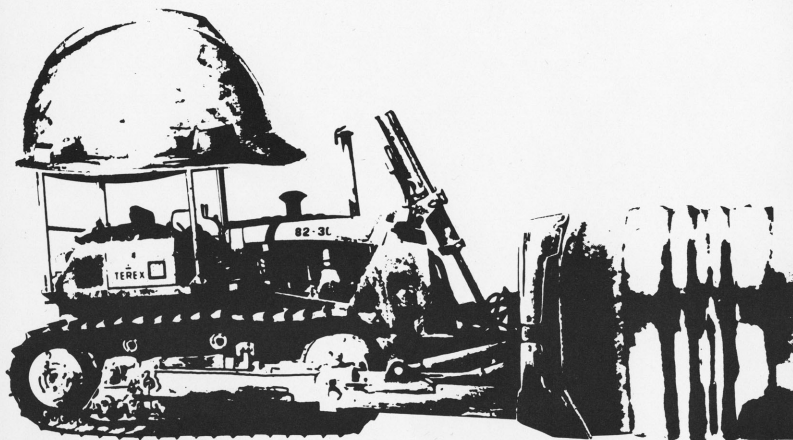

This is the preliminary budget, estimated by Sells; for the structural designs, reinforced by Burton; that put the first floor on the groundwork, surveyed by Weber; that showed where to put the foundation, laid by Unger and Procaccine; that became the first bricks that made the manager that Pratt constructed. This is the conception to completion practice project, administrated by La Rocca; that used the zoning procedures, decoded by Minkin and Heimberger; that permitted financing considerations, transacted by Kuhn; that went into the preliminary budget, setimated by Sells; for the structural designs, reinforced by

Burton; that put the first floor on the groundwork, surveyed by Weber; that showed where to put the foundation, laid by Unger and Procaccine; that became the first bricks that made the manager that Pratt constructed.

These are the final bricks, laid by Olin and Sigman; that completed the structure of the manager, that looked down on the legal negotiations, judged by Herbst; that developed on awareness of the entanglements, that came about from the conception to completion practice project, administrated by La Rocca that used the zoning procedures decoded by Minkin and Heimberger; that permitted the financing considerations, transacted by Kuhn; that went into the preliminary budget, estimated by Sells; for the structural designs, reinforced by Burton; that put the first floor on the groundwork, surveyed by Weber; that showed where to put the foundation, laid by Unger and Procaccine; that became the first bricks that made the manager that Pratt constructed.

# ART & DESIGN

# foundation

n the beginning there was darkness...Then Foundation said unto all in coming freshman: let there be

light!!!, color, and of course design.

However there was still a great void to be filled before students could attain enlightenment. We must fill the space with form someone replied. It's rumored that the haunting voices of the foundation leaders can still be heard today echoing through the halls of Pratt Studios..."Clay and plaster will thy masters"...Thus the broad concepts of form and of space were boldly put forth for benefit of the foundation masses.

Yet there remained an unfilled gap. An underlying need for structure and form, basic lights and darks. Perceiving visual information and directing it on a two dimensional surface. They called it drawing.

And so it was then, is now, and ever shall be this way until the very end of time...for Foundation is the cornerstone upon which all our thinking rests.

Now one recalls those days with warm fondness. An aspiring I.D. student in light and color class "I want to be an industrial designer so what am I painting for?" And the occasional photography student in Form and Space: "But I want to be a photographer, so why am I playing with clay?"

However in drawing class when the first model sheds his/her clothes to reveal every inch of epidermis, those well toned muscles, those curved lines and firm

shapes, do you hear anyone complaining? Nooooooooooooo. On the contrary no one seems to mind at all. In fact everyone is paying very close attention.

And how could one forget their first all nighter eh? Staying in the dorm on weekends and getting wasted because no one has enough pennies left over from their tuition bill to fill a shot glass. Ah such fond memories, farewell Foundation.

# film & PHOTOGRAPHY

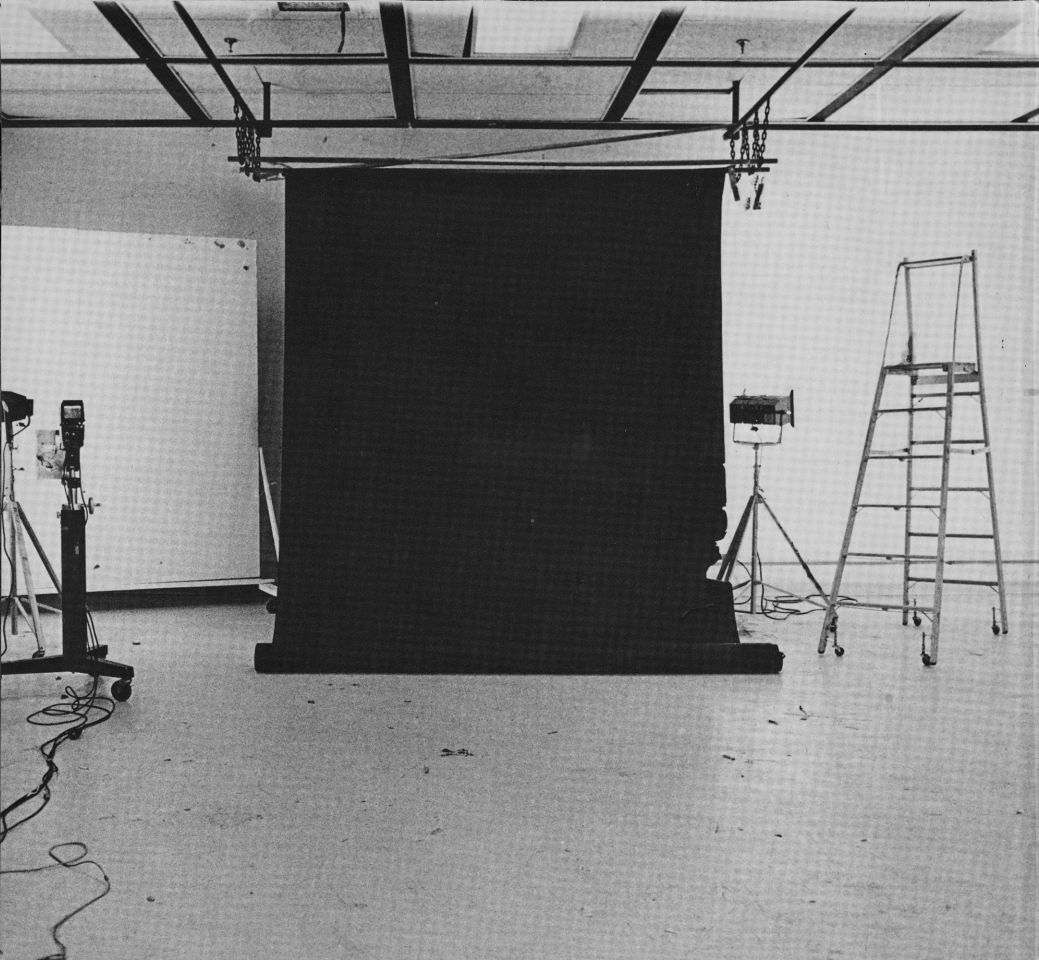

The Pratt Photography Department has an interchangeable 134 credit curriculum; f/4 years, with a B.F.A. lockmount; eye-level instruction with quality image center, microprism collar, and ground glass field. Portfolio review shows B.F.A. indicators for independent manual control or wrong shutter speed; has center weighted instructor-priority, automatic exposure-to-student control with ASA film speeds 25-3,200; hot shoe synchronizer, with Photography Department elective flash, automatically adjusts learning material and lens aperture. Optional M.F.A. attaches at B.F.A. base and reaps higher quality, rapid single-frame or sequence shots at two frames per second. Priced \$16,960 with light-weight senior class, compact curriculum and integrated electives.

**MAIN FEATURES:** Alan Brown, Dennis Chalkin, Arthur Freed, David Freund, William Gedney, David Paul Horton, Maruin Hoshino, Alan Klotz, George Knoblauch, Judith Linn, Jean Locey, Ann Mandelbaum, Elaine Mayes, Paul McDonough, Chris Moore, Philip Perkins, Nina Prantis, Sandy Rosenberg, Sarah Vanouwerkerk, Lynn Zelevansky.

**AIM  
FOCUS  
SHOOT  
LIGHTS  
CAMERA  
ACTION**

The manually keyed type Film curriculum has diversified universal focus with multi-speed power zoom; fully automatic 4 year exposure control of New York City area with a 3 year film core. Instructor's meter exposure and end-of-potential indicators. Provision for on-camera poise; input monitoring before and during filming; automatic learning control; sound understanding and professional ability, indicated by successful graduation. This department operates on 10 instructors; self-resetting faculty counter; need not be engaged in classroom for full power zoom. Priced \$16,960.00 with orientation, culture shock, wrist strap, graduation and eye cup.

**MAIN FEATURES:** Boris Bode', Howard Danelowitz, Bob Fiala, Gordon Hitchens, Lee Howard, Doreen Hyman, Joyce Jesionowski, Paul Killian, Nick Manning, John Snyder.

# FINE ARTS

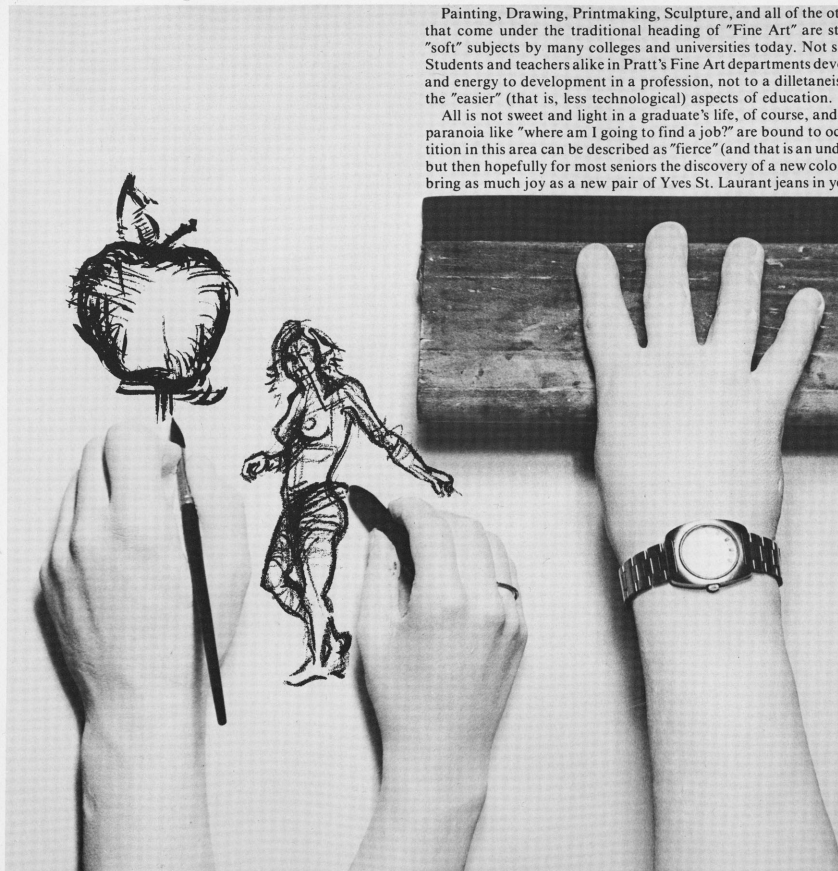

Painting, Drawing, Printmaking, Sculpture, and all of the other activities that come under the traditional heading of "Fine Art" are still treated as "soft" subjects by many colleges and universities today. Not so with Pratt. Students and teachers alike in Pratt's Fine Art departments devote their time and energy to development in a profession, not to a dilettaneish affair with the "easier" (that is, less technological) aspects of education.

All is not sweet and light in a graduate's life, of course, and minor fits of paranoia like "where am I going to find a job?" are bound to occur. Competition in this area can be described as "fierce" (and that is an understatement) but then hopefully for most seniors the discovery of a new color of paint will bring as much joy as a new pair of Yves St. Laurent jeans in years to come.

# ART EDUCATION

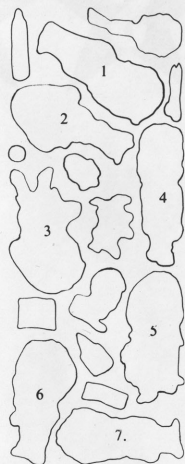

See Dick. See Dick draw. Draw Dick, draw. See Jane. See Jane paint. Paint Jane, paint. See Spot. Spot is Dick's dog. See Dick draw Spot. Dick likes to draw Spot. But Dick needs help. Who can help Dick to draw Spot? Miss Smith is Dick's art teacher. Miss Smith was trained to help people like Dick. She knows the basic principles needed to teach young people. Teaching principles such as educational philosophies and the writing of detailed lesson plans and unit curricula. Miss Smith first put her educational knowledge and theory into practice when she taught at the Saturday Art School program. From there, Miss Smith took a teaching position in a museum-run art education class. This gave her experience in helping to develop the creativity in boys and girls the same age as Dick and Jane. Miss Smith enjoys helping Dick draw Spot. But at the same time, Dick is helping Miss Smith to see the world in a new way. Learn Miss Smith, Learn.

Preparation for the B.F.A. in Fashion Design involves more than just "selecting pattern pieces needed and disregarding perforations." All of the beautiful stay-stitching, gathering, clean finishing, and extremely talented blind-stitching in the world will not help if one is a bore in the realm of imaginative design. Graduates work in various fields designing sportswear, daytime and evening wear, children's wear, or more specialized items within the industry. Department courses reflect this diversification. From shoe design to field work in Seventh Avenue fashion houses, they offer an opportunity to study major aspects of the design world. Instructors in the Design department include: Marilyn Church, John Cloonan, Linda Daly, Madeline Darling, Rose Fabricant, Muriel Fleming, Linda Goldberg, Susan Jones, Marion Lillard, Charles Macri, Frank Manuella, Ronald Marini, Sheila Murrell, Junnosuke (Kandi) Ohno, Paul Reynard, and Paula Vogelsang. The Fashion industry is also a complex business, involving Fashion Merchandizing and Management. What appears to be several tons of managerial/marketing terms such as "F.O.B.'s", "invoices", "buyers", "sellers", and "price-checking" must be digested by undergraduate students of Merchandizing and Management. Of course, the business of fashion is not just business; it is a stimulating mixture of both management and involvement in the rapidly changing fashion scene. Many graduates later receive Masters degrees in Business, while others choose further study in fashion design. The following instructors compose the Merchandizing and Fashion Management faculty: Paul Agule, J. Augustine, Elizabeth Burger, Felix Buttar, Bruce Catt, Marsha Cohen, Marilyn Church, Rose Fabricant, Judie Grimaldi, Thomas Haas, Karen Kramer, N. Kurtis, William Lovell, Larry Nelson, Heidi Alberti O'Brien, Joan Robinson, Ronald Sigal, and Gladys Toulis.

Interior Design is located in Pratt Studios, on the fourth floor, same as Industrial Design. It's not a large department, Jack Aureli, who's the chairman of Industrial Design is the chairman of this department too. He must be a pretty smart fella.

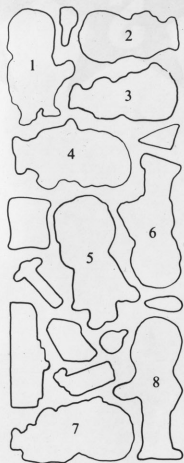

Anyway, the glass showcases which line the corridor of the fourth floor usually have some pretty interesting projects in them. The work fascinates me to the point of wanting to do it. I think I could be pretty good. You know, maybe if I took a few courses, in a few years I could hack it. I could refine my skills, and with a little luck the pieces would begin to fall in the right places. I'd be in Interior Design Magazine. I'd be world renowned. I'd...Naaa!

# THEATRE

DANCE

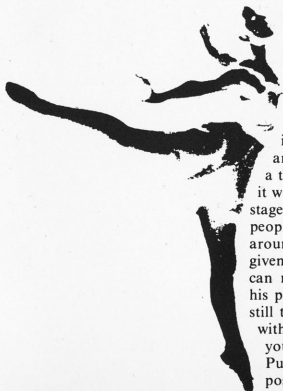

Yes, Theatre is an art, it's even in the School of Art and Design. Three basic ingredients are: what is performed, the performance, and the audience. Each ingredient is essential to the other two. What good would the greatest production be without an audience. For that matter what would an audience gain if they were gathered in a theatre, and nothing was performed? (Although judging from personal experience, it would seem that some directors had this in mind!) Theatre is not confined to just the stage. In the immortal words of William Shakespeare, "All the world's a stage, and all its people mere players." Theatre exists everywhere; next time you're at a Pratt disco, look around you—actors, you'll find them everywhere. Theatre is an art a chosen few are given. Here, we "chosen few" have the opportunity to learn by doing. Theatre at Pratt can mean anything: Shakespeare, you can actually take out autographed copies of his plays in the Pratt Library; Dance, which unfortunately is no longer a major, but still teaches excellent courses in ballet, movement, and the Funky Chicken; Cabaret, with people who still think that sheet music is something to listen to while making your bed; and Puppetry, you remember the famed Rubber Plant Lounge shows. Puppet? What is a puppet? Why it's the inanimate made animate—kind of the opposite of the Bursar.—J.K.

# INDUSTRIAL

DESIGN

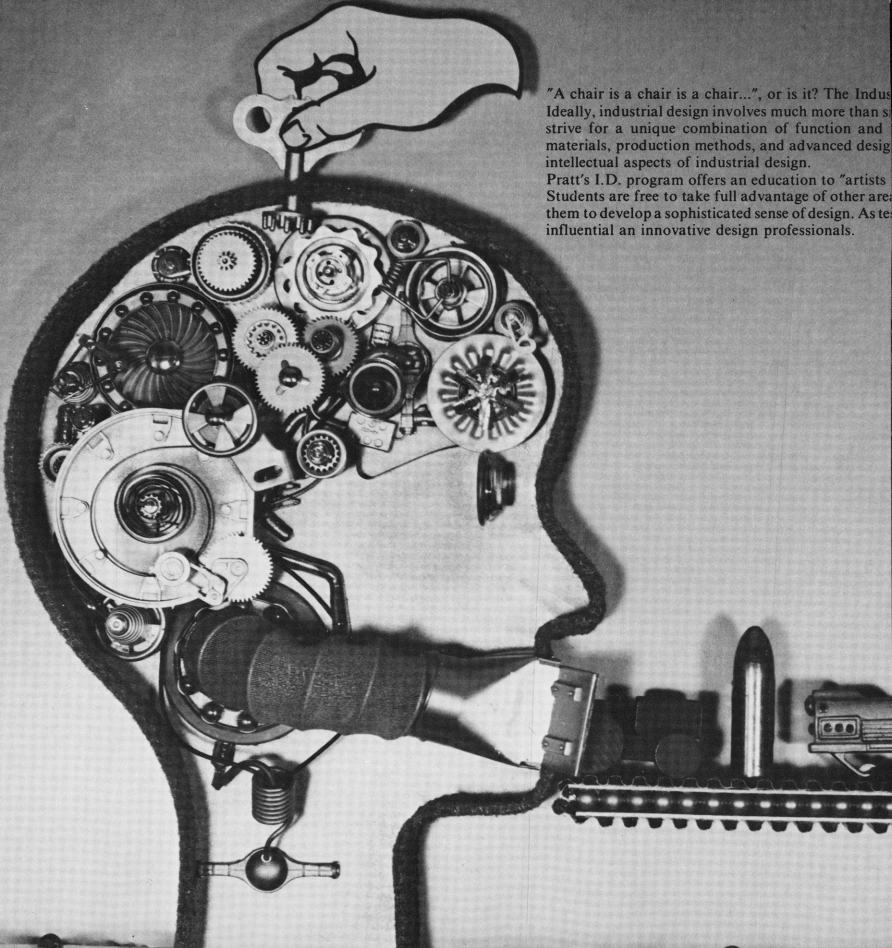

"A chair is a chair is a chair...", or is it? The Industrial Design department certainly does not seem to think so. Ideally, industrial design involves much more than simple mass production of utilitarian items—rather, designers strive for a unique combination of function and form. The twentieth century has seen an explosion of new materials, production methods, and advanced design procedures; just as these areas have expanded, so have the intellectual aspects of industrial design.

Pratt's I.D. program offers an education to "artists who have elected to apply their talents to Industrial Design." Students are free to take full advantage of other areas of the school (such as electives in drawing, etc.) that enable them to develop a sophisticated sense of design. As testimony to this, many Pratt graduates have gone on to become influential and innovative design professionals.

# INDUSTRIAL

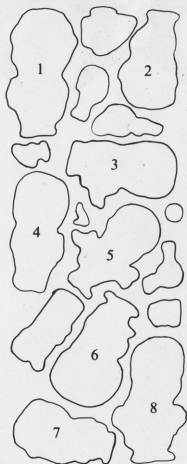

DESIGN

"A chair is a chair is a chair...", or is it? The Industrial design process is a complex one. Ideally, industrial design involves much more than simply creating a product. It involves a unique combination of function and form, materials, production methods, and advanced design techniques. It is the intellectual aspects of industrial design.

Pratt's I.D. program offers an education to "artists" who are not just interested in design, but who are also interested in the technical aspects of design. Students are free to take full advantage of other areas of the school to develop a sophisticated sense of design. As a result, they become influential and innovative design professionals.

*We are born to work and study.* — John Roebling

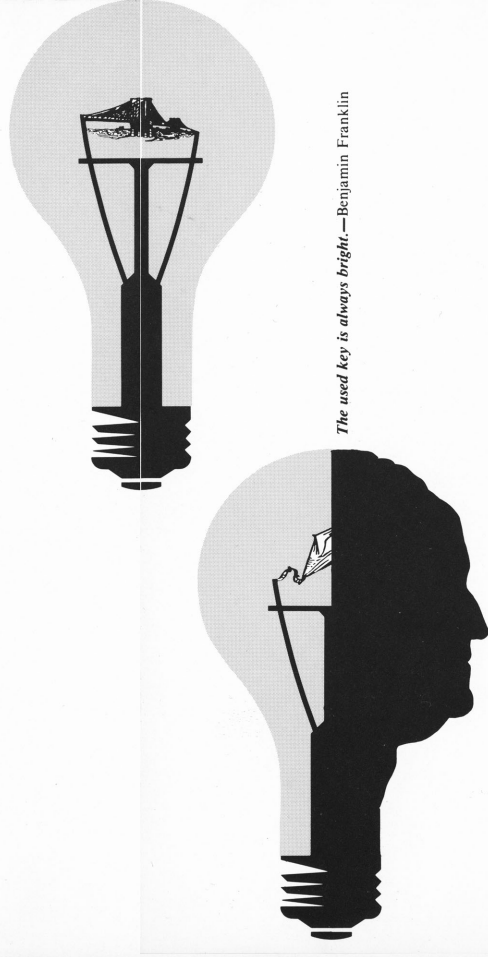

Nozzles, orifices, and weirs,  $h$ , hybrid- $\pi$  and  $s$ -parameters, momentum, energy [Logic]— FFT•2 transform (+control bus IC's) = U arts. Guided electro-magnetic wave theories, signals and spectra, probability. Inelastic behavior, function under stress, tension, compression + fatigue tests = (Advanced Laboratory I and II?). Magnetoplasma-dynamics, thermoelectricity thermionics, paramagnetism resonant cavity maser amplifiers, plus Regression and analysis (after that why not... thick walled cylinders, noncircular torsion + contact stress and power screws (interesting) — not to mention shafts, keys, and couplings — Gunn and Impatt microwave devices (mmm...), plus D.C. and A.C. rotating machines, multi-vibrators and moments of inertia (don't stop now). Beams, frames, and articulated structures, Forces of static fluids, laminar and turbulent flows, qualitative and quantitative techniques, stimulated and spontaneous emission of radiation (includes special studies under direction of the faculty) — K-maps and state diagrams, combinational and sequential logic, solid state memories, sinusoidal oscillators and theories of failure (oh no!) And finally...terminations (details arranged with instructor). Engineering certainly does sound fun!

# FOOD SCIENCES

Combine in a large pot the following:

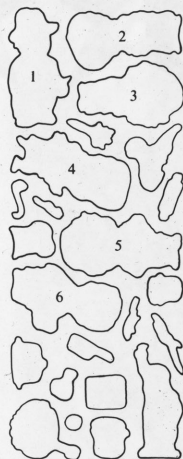

- 1 student, 3 teaspoons Basic Food Preparation
- 1 cup finely diced Food Sanitation and Safety
- 3 bunches of Whole Cost Accounting
- 2 cups of sifted Personal Administration
- 1 small Introduction to Management

Mix at high speed until smooth (about 5 minutes). Then with a fork carefully fold in 1 teaspoon of each of the following ingredients: Layout, design and Equipment in Food Service Areas, Fundamentals of Accounting, Nutrition I and II, Environmental, Historical and Cultural Aspects of Food, and General Dietetics. If General Dietetics is not available any 1 of the following may be used as a substitute: Management, Therapeutic and Clinical Dietetics, Community Nutrition, or Food Technology. Then pour into a lightly greased and floured baking pan. Cook at 350° for 4 years or until ready. Remove and voila, you are now ready to put your knowledge to good use in the professional world.

## A black and white photograph of a person in a costume. The person is wearing a tall, crumpled paper chef's hat. Their face is covered by a mask that has large, dark, circular eyes and a long, thick beard made of spaghetti strands. They are also wearing a light-colored apron over a dark long-sleeved shirt. In front of them, resting on a surface, are several round bread rolls. The background is plain and light-colored.

A collection of 20 cutouts of famous figures and symbols, arranged in a grid-like fashion. The cutouts are: 1. Martin Luther King Jr. (top left), 2. John F. Kennedy (top center), 3. George Washington (top right), 4. Abraham Lincoln (second row left), 5. Franklin D. Roosevelt (second row center), 6. Winston Churchill (second row right), 7. The Great Seal of the United States (third row left), 8. The Statue of Liberty (third row center), 9. The American flag (third row right), 10. The White House (bottom row left), 11. The Lincoln Memorial (bottom row center), 12. The Washington Monument (bottom row right).

# HUMANITIES

## “MAN IS THE MEASURE OF ALL THINGS” Protagoras

Man is the measure of all things...Presumably because of his capacity to think in abstract conceptual terms while at the same time being able to reason logically. Hmmm...

Ah-hemm. Just because people can reason logically doesn't mean that they always do. Even if we know what's best for ourselves, 95% of the time we go against our own better judgement anyway. Weighing our wants with our needs, we usually end up with an ice cream cone instead of a subway token, having to panhandle our way home, short changed again.

I'm just in it for the credits! Gimme those credits! Good teachers? Yeah, as long as

they fit into my schedule. I'm trying to keep Fridays free (isn't everybody?)

Yes, understanding yourself can be very difficult. The humanities are a way of unlocking your own insights and exciting your intrests through personal experience.

The thirst for knowledge should increase. It must increase. The one lesson above all others that should be taught as well as learned is to dwell upon not how much we know, but how little. To realize that four years of furthering your own formal education has not come to an end but merely a begining.
